

While at SLBC

D.M.L. Colonne
Director of Engineering
MBC Networks (Pvt) Ltd
Tel.No : 2840267
Email : colonne@mbc.maharaja.lk

In 1979, I joined the Engineering Division of the Sri Lanka Broadcasting Corporation where I was attached to the Radio Laboratory upto the year 1991.

While at SLBC, I was a member of the project team, where we launched the 1st stereo transmission and my responsibility was to arrange one of the continuity studios for stereo transmission. I bestow my gratitude to Mr C.D. Silva, Mr Terence Peiris, Mr W.S.E. Fernando, Mr Devendra Weerasinghe and Mr Shanthi Fonseka for guiding me towards the success of my career. Thereafter I left SLBC in 1991 in order to better my prospects abroad.

During my career at SLBC, I gained tremendous experience on radio broadcasting and with this experience, I joined MBC Networks (Pvt) Ltd, the leading private radio broadcaster in Sri Lanka during 1993, who operates four FM broadcast networks namely Sirasa FM, Shakthi FM, Yes FM and Y FM. I am proud to announce that all MBC studio operations are fully digitalized and we are ready to switch to digital broadcasting as soon as the spectrum regulatory releases a frequency band on behalf of the same.

I hereby wish all the very best to the newly developed website created on behalf of the SLBC Ex-Engineering Staff Association, and also take this opportunity to wish SLBC all the success in its future endeavors.
